Table A-2.—URBAN PLACES IN 1950, ALPHABETICALLY BY COUNTY, WITH 1950 POPULATION

[Listing excludes counties with no urban area in 1950. For area codes, see tables A-3. In many States, the population in "urban places" is somewhat less than the total urban population. Only incorporated places (cities, villages, boroughs, towns) of 2,500 inhabitants or more and unincorporated places of this size outside urban fringes, are called urban places. The remaining urban population comprises residents of those portions of urban fringes that are incorporated places of less than 2,500 or are unincorporated. Percent not shown where less than 0.1. Minus (−) sign denotes decrease. Asterisk (*) denotes an unincorporated place]

APPENDIX C

CLIMATE: SUBSTITUTED WEATHER STATIONS

As indicated by the descriptive text for items 327-333, and footnotes in table 4, climate data could not be supplied relating directly to a number of cities because those places either had no weather station, or had weather stations with records too short to provide reasonably reliable weather statistics. For all but 9 cities, however, observations from nearby stations having approximately the same weather conditions were substituted. The following table lists those cities for which substitutions were made and identifies the weather station substituted.
